Profile

Software Engineer with **6+ years of experience** designing and developing scalable backend systems, cloud applications, and distributed platforms across Intuit, Amazon, and Walmart.
Experienced in Java, Python, Spring Boot, AWS, Kafka, Spark, and data processing systems. Interested in applying **Artificial Intelligence** to improve engineering workflows, automate repetitive processes, and build intelligent systems that help teams make better decisions.

Technical Skills

Languages: Java 11/17/21, Python, Go, TypeScript, JavaScript
Backend: Spring Boot, REST APIs, Microservices
Frontend: React.js, Node.js
Streaming: Kafka, Spark, SQS
Cloud: AWS (EC2, Lambda, S3, CloudFormation, CDK, Step Functions)
DevOps: Jenkins, Docker, CI/CD, Kubernetes, GitHub Actions
Databases: PostgreSQL, DynamoDB, Redis
AI/ML: Machine Learning, NLP, Generative AI Concepts, Prompt Engineering, AI Agents

Professional Experience

Walmart
Software Development Engineer III - Marketplace Seller Experience
Bellevue, WA (Mar 2026 – Present)

- Developed **Java 21 + Spring Boot backend services** for Walmart Marketplace Seller Experience supporting seller portals and frontend applications across US, Canada, and Mexico markets.
- Designed and implemented **REST APIs and modular backend components** using adapter-based architecture for scalable marketplace capabilities.
- Built and optimized **event-driven workflows using streaming technologies** improving communication between marketplace services.
- Collaborated with Product, UX, and Engineering teams to deliver end-to-end seller experience enhancements.

Amazon (Contract)
Senior Software Engineer
Bellevue, WA (Sept 2025 – Mar 2026)

- Developed and maintained binary release pipelines across Amazon Retail and Business iOS, Android, and Fire OS applications.
- Launched SMS notifications for Amazon e-commerce return and refund workflows across 30+ transactional use cases.
- Improved product features through A/B testing and Weblab-based rollout strategies at million-customer scale.
- Collaborated across Product, UX, and Engineering teams to deliver customer-facing improvements.

Intuit
Senior Software Engineer (Jan 2023 – Mar 2025)
Software Engineer (Oct 2020 – Dec 2022)

- Built **GDPR/CCPA compliant PII anonymization REST microservice** using Java Spring Boot, AWS Lambda, and API Gateway.

- Developed Kafka stream consumers processing 20K+ daily events for distributed billing workflows.
- Built **PySpark ETL pipelines** processing millions of Salesforce records into AWS S3 data lake.
- Migrated 13 services from AWS CloudFormation to **AWS CDK** enabling Infrastructure as Code.
- Implemented Redis caching for authentication flows reducing service calls by 80%.
- Built CI/CD automation with testing, security scanning, and GitHub integrations.
- Monitored production systems using CloudWatch, Splunk, and Wavefront achieving 99.9% uptime.
- Mentored engineers, reviewed pull requests, and participated in production incident management.

OpenText
Software Engineer (Aug 2019 – Dec 2019)

- Developed a **Rasa-based NLP chatbot** with React.js interface to automate organization helpdesk workflows.
- Enabled users to raise and track support tickets through conversational interactions using intent classification, entity extraction, and dialogue management.

Projects

Intelligent Meeting Summarizer
Built Python/Flask-based AI application to summarize meeting discussions and extract important insights.
Video-to-Text Translation using Whisper
Developed AI pipeline using speech recognition models to convert video audio into text and support translation workflows.
AI Chatbot Platform
Built conversational AI workflows using Rasa with NLP concepts including intent classification, entity recognition, and dialogue management.

Education

Bachelor's in Computer Science
KMIT, JNTU Affiliation (2016–2020)
GPA: 8.23/10

Certifications

NPTEL (IIT Madras) - Introduction to Machine Learning
Machine Learning with Python
Prompt Engineering Bootcamp (2025)

Awards

Professional: Team Award FY24, Top Talent FY23, Individual Bravo FY22, Team Award FY21
Academic: TCS Codevita 96%, Virtusa Hackathon 96%, Arjuna Coding Contest 99%
